

Cameron Hermens

Software Engineer

OVERVIEW

Seasoned software engineer with 7+ years of experience collaborating with cross-functional teams to deliver high quality web applications with a customer-first mindset. Currently open to full-time positions with an established company to continue developing creative solutions to complex problems and always striving to learn more.

EXPERIENCE

Software Engineer

GoFundMe

June 2018 - Current

Started as a Front End Engineer on the Design Engineering team, with a heavy focus on PHP, React and TypeScript. Promoted to Software Engineer in May 2020, with a goal of continuing to become a more well-rounded, full-stack engineer. Domain expertise with all core front end technologies, i18n, a11y, SEO, and UX best practices. Includes regular navigation of both legacy frameworks and modern microservices architecture.

Lead Web Developer

Organik SEO

May 2016 - Apr 2018

Full stack WordPress and Magento web development and web-related business development. Rebranded Organik SEO, shaped department and service offerings, led to two additional hires and nearly doubled web sales within the first year.

BLVR

Digital Analyst / Marketing Project Manager

BLVR

Feb 2013 - Feb 2016

Data analysis for websites and digital marketing initiatives. Developed websites and landing pages utilizing WordPress and Magento platforms.
