

Cameron Hermens

Software Engineer

OVERVIEW

Seasoned software engineer with 9 years of experience collaborating with cross-functional teams to deliver high quality web applications with a customer-first mindset. I'm looking for a mid- to senior-level position where I can continue focusing on full stack solutions, particularly in the areas of developer experience, Golang, TypeScript, and React.

EXPERIENCE

Software Engineer II, Developer Experience

August 2021 - October 2022

Responsible for making other engineers more productive. Lots of work with CI/CD, Jenkins, Docker, automation/developer tooling, CLI development with Go, and Kubernetes (k8s). Served as a tech lead for a number of projects.

Software Engineer I, Platform Engineering/Developer Experience

May 2020 - August 2021

Responsible for GoFundMe's checkout page, with a heavy focus on TypeScript, React and Redux, in addition to all core frontend technologies. Shifted to a Developer Experience team in February 2021.

Frontend Engineer II, Design Engineering

June 2018 - May 2020

Heavy focus on all core frontend technologies, i18n, a11y, SEO, and UX best practices.

Lead Web Developer, Organik SEO

May 2016 - Apr 2018

Full stack WordPress and Magento web development.

Digital Analyst, BLVR

February 2013 - February 2016

Data analysis for websites and digital marketing initiatives, WordPress and Magento web development.
